Claridge's

London's Art Deco jewel

Considered to be one of the finest hotels in the world and located in the heart of London's Mayfair, Claridge's, embodies grand English style, timeless glamour and impeccable, intuitive and highly tailored service. It is London's Art Deco jewel, and home to breath-taking rooms and suites. For more than a century Claridge's has collaborated with some of the world's most influential designers. Claridge's Art Deco transformation took place in the 1920s and 30s.

At the centre of this were the combined talents of Basil Ionides and Oswald Milne. A series of collaborations with David Collins and Thierry Despont added flourishes to the Claridge's Bar, the restaurant and several suites in the 1990s. Twenty rooms and suites launched in 2010 were the first interiors projects in the distinguished career of Diane von Furstenberg. The Ballroom, French Salon and Drawing Rooms were restored by noted architect Guy Oliver. In 2012, twenty five suites were completed by David Linley, one of Britain's most respected designers and craftsmen.

As part of an ongoing programme of renovation TOTO has been specified throughout the hotel. NEOREST WASHLET™ were installed in the Grand Piano Suite designed by Diane von Furstenberg plus different WASHLET™ in many suites and rooms including: Claridge's Suite; Superior King; and the Deluxe King.

Great Scotland Yard Hotel, London

Where tradition and history meets modern luxury

Great Scotland Yard Hotel was once the original headquarters of the Metropolitan Police, the Ministry of Defence and the private home of Scottish Royalty; it is now transformed into a grand 5-star luxury hotel in the centre of London. An 1820's Grade II listed building with both Victorian and Edwardian architecture, it is where tradition and history meets modern luxury. It is part of the Hyatt Group's Unbound Collection, its first in the UK.

EPR Architects breathed new life into this neglected building which is located a stone's throw from Trafalgar Square, where they created 153 rooms with several eateries, whisky bar and members room. They sensitively reconfigured the building adding loft space and basement areas whilst the design retained the style of the original building and sits comfortably in its traditional surroundings.

Hirsch Bedner Associates (HBA) were responsible for the interior transformation that expresses the individuality of this infamous building. With an unexpected play of Edwardian-inspired hues and patterns, conventional Whitehall (home of the British Government and Civil Service), and a burst of colour that relives the timeless elegance and sophistication of the era with a battery of contemporary detailing.

Bathrooms of all the suites are installed with either WASHLET™ SG, GL or NEOREST EW adding next level hygiene and comfort for the hotel guests. The impactful bathroom designs combine all the elegance of a bygone era; marble floors and surfaces, richly tiled walls and glass screens and have WASHLET™ fitted as standard - demonstrating how TOTO state-of-the-art shower toilets fit seamlessly with traditional architecture and interiors.

MEURICE

Le Meurice, Paris

A luxury hotel with tradition

Le Meurice, celebrating its 180th anniversary this year, chose the Japanese brands's leading-edge technology for the restroom renovation.

Since 1835, Le Meurice, opposite the Tuileries Gardens, has been frequented by the who's-who of Paris: members of high society have long shared this luxurious establishment with aristocrats and celebrated artists.

The staff of the hotel has many day-to-day responsibilities, but the most important entail ushering Le Meurice into another millennium, offering the finest services in a tranquil and hospitable setting, installing the most innovative technologies and meeting the least-expected needs of international customers.

This quest for improvement, appealing aesthetics and the ongoing effort to satisfy the demands of a ceaselessly evolving clientele have led the property to rethink its restroom areas, which are the most-visited spaces in the hotel, seeing traffic of 170,000 people a year.

Fabien Coubard, Project Manager at Le Meurice, deliberately chose TOTO based on past experience, for the renovation of the restroom in 2015: "(...) It is about more than quality: to my mind, a luxury establishment like ours should be a trail-blazer and consideration must be given to how this space will evolve," he explains.

Fabien Coubard chose the SG series range for its technological features and lightweight design, which harmonises perfectly with the desired ambiance.
