Adjustment of the product range during the year as of 15 July 2022

Dear Ladies and Gentlemen,

Due to the continuing extraordinary situation with regard to the gas price development and raw material supply as well as logistic bottlenecks, we unfortunately see ourselves forced to carry out a further adjustment of the product range during the year. Among other things, this is intended to ensure a better service level for the current range.

Please find attached a list of products that will be discontinued by **15th July 2022** and will no longer be produced in the future. Some of the listed articles are still in stock - as long as supplies last. We ask you to take this into account for your future planning.

We hope for your understanding and thank you very much for the good cooperation.

With best regards

Dr. Jörg Schwall

Managing Director
